

Why	A dirty condenser restricts airflow that results in excessively high operating temperatures. High operating temperatures reduce drink capacity, shorten component life and can void warranty on the Compressor.	
Time required	2 minutes to prepare	5 minutes to complete
Time of day	Early morning or late evening	For 24-hour restaurants: at beginning or end of shift
Hazard icons	 Chemicals	

Tools and supplies

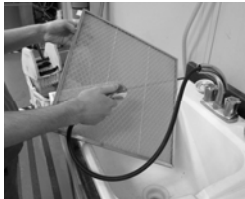

Degreaser Solution

Sprayer Hose

Procedure

1	<p>Remove condenser filter</p> <p>Open the merchandiser and locate the condenser filter.</p> <p>Remove the condenser filter by grasping the two tabs and sliding the filter straight out of the front of the unit.</p>		4	<p>Re-install condenser filter</p> <p>Slide condenser filter into slot with the mesh side down.</p> <p>Close the merchandiser</p>	
2	<p>Wash condenser filter</p> <p>Wash the filter by back flushing with a spray hose in the back sink. For greasy deposits, spray filter with a degreaser solution before spraying.</p>				
3	<p>Dry condenser filter</p> <p>Shake out excess water and allow filter to air dry before re-installing in the unit.</p>
